New York, June 1.-Victor L. Ber- Street Railways Force Emer, alderman at large of Milwaukee, Wis., recently captured by the Socialists, caused a stir in newspaper circles along Park Row, many and varying interviews appearing in the morning papers with the prominent Milwaukee Socialist.

This is the first time that Alderma Berger has been in New York since the Milwaukee victory on April 5. One of the papers talks about Berger as follows:

"Victor Bergor, who managed the victorious campaign of Emil Seidel, Milwaukee's latest experiment in the line of mayors, is in town. Although the election was held about six weeks ago, Berger is still fushed with the Socialist victory. He terms it the concentrated effort of twenty-six years of hard work and tons of Socialist literature.

Another complant which the mayor investigated was from Superintendent Momen of the house of correction, who wants a physician appointed for the police court. "My Word, He's Awful, Don't You Know," Exclaims English Press

London, June 1.—Government officials and members of the English cabinet are today convinced that Colonel Theodor Roosevelt's speech yesterday at Guildhall, in whi h he rebuked England's administration of affairs in Egypt, wil greatly increase the difficulty of dealing with the delicate political situation that confronts England in Egypt.

Owing to the semi-official character of Roosevelt's visit, by reason of his appointment by President Taft to represent the United States at the funeral of the late King Edward, English officialdom will make no comment for publication regarding the speech. But nothing could be plainer than that the leading politicians fear Roosevelt's bold utterances will act as a fuse that will yet touch off an upheaval in Auglo-Egyptian relations.

Compared With Other Blunder

There were constant comparisons today between Roosevelt's position and the Lord Sackville. West incident of October, 1888, when the then English ambassador to the United States was dismissed by President Cleveland be-cause he privately wrote a letter ad-vising a citizen to vote for Cleviand. It is contended that the cases are parallel, but it is insisted by many that Roose-velt has been guilty of a breach of dip-

lomatic propriety.
Today's criticism of Roosevelt increased in severity. The Evening Star takes the hardest rap at him.
"Roosevelt has long been unaccustomed to being spoken to plainly," it

says. "He has long lived in a perfect stew of eulogy, but the temptation is irresistible to tell him that he is guilty of a grave offense against the laws binding host and guest and against the laws binding host and guest and against the laws that govern the White House when he was its occupant. The fact that his predecessor was assassinated should have made him most careful in his comments regarding the assassination of Boutros Pashs, the Egyptian premier."

Graphic Raps Him

The Daily Graphic reminds the colo

This is suggested by the old English saying. "Don't teach your grandmother how to suck eggs."

Papers Play It Up

Not since the death of King Edward have the London papers played up a story both editorially and in a news way as they have Roosevelt's speech. Naturally, the Conservative press is more friendly than the Liberal and Radical, inasmuch as Roosevelt's views are paraphrases of their own.

The Express, Telegraph, Mail, Post, Standard and Times are almost forced to approve of the speech.

But even the Conservative press, while agreeing with his views, doubt the propriety of his utterances.

The act is pantomime, with the sensibility of the murder upon the hands shousness of the Apache dances, which were introduced into this country by the same author, G. Molasso. There are pretty conceits through the skrit, and not a smell vein of humor. The author or composer has combined a series of grotesque, sprightly, franky and graceful dances. European love of the string are in the back-ground largely for Miss Payne as the leading performer, and it might be stated that she is an engage.

Suggests to ner lover to put the scandiblity of the murder upon the handstoller with the bag of burglar tools—small matter, but the lover flading a murder too strong an exhibition of affection, cruelly "casts her aside." Revolvers gleam, but only one shot is fired, and that before "The Dramatic Problem Episode" begins to puzzle the hunddled-together audience. Thanks also to the artist of "The Dramatic Problem Episode" for having the little killing of the husband done before curtain rises. Well, when the police officer calls in response to a telephone call, the wife, with self-inflicted widowhood, faints.

COURT ATTACKS RATE INCREASE

Wall Street Feels Shock as Writ Halts Blow Against Shippers

(By United Press Associations.)

St. Louis, Mo., June 1.—There was no advance in freight rates put into effect today by the twenty-five railroads of the central west. Following the action of Federal Judge David P. Dyer at Hannibal late yesterday in granting a temporary injunction restraining the temporary injunction restraining the railroads from enforcing, effecting or making a general advance in interstate rates, United States District Attorney Houts and Special Attorney Edmund P. Grosvenor, from the attorney general's office, will file here today an expediting certificate under the act of Feb. 11, 1903, providing for a speedy deter-mination of the issues in contempla-

Injunction Granted

The injunction granted yesterday was on a petition filed by the government alleging that the advance in rates was arrived at by the defendants through violation of the Sherman anti-trust law. The petition was first filed in the United States Circuit court in St. Louis. as stated exclusively by the United Press yesterday. Attorneys Grosvenor, Houts and Special Assistant Attorney to the Government Frederick N. Judson then hurried to Hanaibal, where Judge Dyer was sitting, and the injunc-tion was granted there. The data for a hearing on the restraining order will probably be set today. The roads rectrained from increasing

New York, June 1.—The action of the government in applying to the courts to compel the railroads to stop manipulating and raising freight rates, threw Wall street into a near-panic today. The stock market opened weak and the pressure was of the most pronounced character. Prices sold off during the first hour from three to six points, with no evidences of support from the big bull leaders.

Independence day celebrations. The mayor is much interested in it, being emphatically opposed to the indiscriminate celebrations of the west.

In Springfield the July Fourth celebrations are conducted under the auspices of the Independence Day association. Of the work of this organization its secretary, Edward T. Broadhurst, says:

"The effort to bring a out a more safe, orderly and patriotic observation of Independence Day in Springfield began in 1903 with the organization of a group of citizens. The object has been of course, to restrict the use of dangerous explosives and to emphasize the possibility of recognizing the spirit of the day in other ways, such as parades, historical pageants and tableaux, patriotic addresses and choral singing athletic events on land and water, band concerts and fireworks. All these event, have been conducted by committees.

Last year there were concerts morning, afternoon and night by five bands; patriotic exercises in the court house and other public squares; athletic events, choral singing, acquatic events and parades and an historical pageant. On the program are printed many sketches from early Springfield history

SANE FOURTH BOOKS YOU SHOULD READ

The following books form almost a complete library of modern scientific and sociological thought. They should be in the hands of every Socialist and progressive thinker:

THE EVOLUTION OF MAN. By William Boelsche; translated by Ernest Untermann. This book tells in detail, in a clear, simple style, illustrated by pictures, just how the descent of man can be traced back to the animals composed each of a single cell. It is up to date and gives the latest discoveries in science. It is THE book on the subject. Cloth, 50 cents.

GERMS OF MINDS IN PLANTS. By R. H. France; translated by A. M. Simons. This book tells in a charming and entertaining style how not only dumb animals, but also plants receive impressions from the outside world and use the data thus obtained to modify their movements, just as humans do. Cloth, 50 cents.

THE TRIUMPH OF LIFE. By William Boelsche; translated by May Wood-Simons. This book is even more interesting than the "Evolution of Man," by the same author. It tells of the struggle of life against its physical environment, and introduces a wealth of scientific detail. Cloth, 50 cents.

PRINCIPLES OF SCIENTIFIC SOCIALISM. By Charles H. Vail. This is the most successful summary of Marxian Socialism ever written by an American author. It covers every phase of the subject. Cloth, \$1.00.

ANCIENT SOCIETY. Researches in the Lines of Human Progress from Savagery Through Barbarism to Civilization. By Lewis H. Morgan. This epoch-making and much-quoted book enunciates the law of historical materialism familiar to all Marxian students. Cloth, 570 pages, \$1.50.

THE ANCIENT LOWLY. A History of the Ancient Working People from the Earliest Known Period to the Adoption of Christianity by Constantine. By C. Osborne Ward. Cloth, 2 vols.,

THE ORIGIN OF THE FAMILY, PRIVATE PROPERTY AND THE STATE. By Frederick Engels. The author has summarized and popularized the information given more fully in Morgan's "Ancient Society," and has added many important facts. Cloth, 50 cents.

"HOPE" FOR A

There has long been one unfilled want in the ranks of Socialist journalism. There have be scientific publications in plenty. There have been many leaflets in simple language for propaganda. There are monthlies, bi-monthlies, weeklies and dailies.

people thought Socialism was pessimistic.

Socialists ought to be the most hopeful, happy people in the world. They are the only ones that have a right to be happy, for they alone see the possibility of joy for all.

No one has done more to inject cheer into the Socialist movement than Ward Savage, the cartoonist of the Daily Socialist. Now he is going to hand out a monthly installment of pure "HOPE"

It will come in the form of a magazine of wit and humor and illustrations, called "HOPE."

The Hustlers' Column

When machinery shall be used to the limit of possibility, and its enefits go only to those who work we believe that the production of necessities and luxuries can be made so pleasant that our work will be our pleasure.

Until that time comes there are only occasional opportunities to enjoy ourelves and produce good at the same time. One of these times is here now and we should take advantage of it.

On June 19 there will be a great press picnic at Riverview. Perhaps you heard something about that before. On that day the host of Socialists with their friends will meet for a good time. We will have Comrade Seidel, Mayor of Milwaukee, with us. All the Socialists will be there. Every Socialist paper in Chicago, and there are a dozen and more of them, is telling its readers about it, and they will all be on hand. They will speak a dozen languages and the Socialist press picnic. There are demonstrate to the world the international character of American Socialism.

So we are sure to have the play, and the good time. But we will be working for Socialism at the same time, for every dollar made at the picnic, and every dollar received for tickets will go to help support and improve the Socialist

All the money received from the tickets sold through each paper will go directly to that paper. So there will be that spirit of emulation, so different from competition, that goes to make good sport.

The amount of fun we will have and the work we will accomplish depends upon how many people have a chance to get out to Riverview on the 19th. That will depend upon how active YOU are in selling tickets.

Ordinarily, selling tickets is rather ungrateful work. This time it will be easy. There are very few men, women or children in Chicago who do not go to some amusement park several times during the summer. They usually pay their way in and then spend several dollars while there. This time they can get such a bargain that their money will give them twice as much fun as usual. Just

show anyone the ticket that is offered for this occasion and the sale is made. Call in today and get a bunch of these tickets and then watch them go. A month's subscription to the Daily Socialist with every five tickets sold. Cover your precinct with subscribers and see Socialism grow.

THE RIGHT OF WOMEN TO VOTE

To my mind there is no vaid argument against the right of women to vote on equal terms with men. The proposition is self-evident that woman, being a human being and a citizen of the community, the same as man, is entitled to equal rights, privileges and ought to be, and shall be, the equal opportunities.

Let me ask this simple question: What justice is there in compelling women to obey laws they have no voice in enacting? This question has never been answered and never can be answered except in one way.

If woman is less than a human being, less than a citizen, a mental weakling, less than a citizen, a mental weakling, requiring man as a guardian; if she is

swered except in one way.

If woman is less than a human being, less than a citizen, a mental weekling, requiring man as a guardian; if she is but the property appendage and conbut the property appendage and con-venience of her lord and master, then I submit she ought not to have the right but the property appendage and convenience of her lord and master, then I submit she ought not to have the right to vote, but should in all meekness resign herself to her divinely (?) appointed to, the echo of her husband, the servor of the ballot. But it is particularly in the name of vant of her sovereign, satisfied to spend all the days of her life in the realms of en in the United States that I raise my reseated the some of the five millions of wage-working womans. ental inferiority and political non-ex-

But woman has all the essential qualities of man, not excepting mentality and initiative, and if she is to develop the best there is in her, she must be free and she must be the equal of man in respect to every right and every op-portunity required for the untrammeled expression of her voice and will. Lesier F. Ward, greatest of Ameri-

can sociologists, says: "We have no conception of the real amount of talent or of genius possessed by woman. No. the reason that woman has never had the chance to unfold, to develop her latent powers and energies and to show the world what she is really capable of accomplishing.

But there has been a wonderful change of sentiment upon the woman question during the last few years and the change will be still greater during the change will be still greater during the years immediately before us. Old prejudices, ignorant customs and bar-baric traditions are being swept aside. The new spirit, the spirit of the com-ing social democracy, is asserting itself everywhere and the world is beginning to heed its cry and to re-shape its in-stitutions, based upon mutual economic interests and the absolute equality of the sexes.

As for the women who protest that

voice in behalf of unrestricted woman suffrage. These women have to go out in the world and compete with men in industry, in business, in educational and professional life, and why should they not have the same political rights and privileges? As a rule they are the vicinity of the most variest discrimination. tims of the most unjust discrimination in respect to wages and treatment, be-cause they lack even the limited means of self-defense with which their male competitors are provided by their man-

hood suffrage.

If the pampered pets of society do net want to vote, the working women do, and for reasons that no society queen, such as Mrs. Stuyvesant Fish, with all her brilliant sophistry, can successfully deny.

Thirty years ago Susan B. Anthony, the noble champion of woman suffrage in the early days of the movement, was treated with almost brutal contempt by the "better element" of society, in the city of Terre Haute; today her name is honored throughout the civilized world.

The cause of woman's rights is advancing with the cause of man's intelli-gence, and no matter how many ob-stacles may be thrown in its way by ignorance, prejudice and sordid self-in terest the time is coming when woman will be the equal of man, when both will As a Socialist I see no reason why be free, when society will rise to a woman should not be the comrade of higher plane, and enter into a larger her husband upon equal terms in all the

BAILY SOCIALIST MAGAZINE PAGE

It was a cold, gusty day in Paris, threatening to rain any minute, but we rode on the top of an omnibus and were early in the group that stood outside the palace of

ie Champs Elyssee.

We shivered and wished that the doors would open. though by many a harrowing experience we knew that it would be colder inside. At last the lock clicks, the big doors open, we show our tiny slips of paper and go racing. tearing up the broad staircase.

tearing up the broad staircase.

Are these boys and girls, you ask. Yes and uo. Grown a little larger but still boys and girls, acting as you have seen them act at many a high school and college commencement. The same high hope and happiness are in each face and in the movements of all.

They seem to be of all grades and conditions of life and society, and many are in middle life and past it. Nevertheless, this is their graduating day, that marks the end of a year's work and the result of theirs has been counted good enough to hang in the Salon to be viewed by all the world who cares to come and pay a franc for the privilege world who cares to come and pay a franc for the privilege

The pictures have been hung by the committee in charge. They are distributed through forty-three rooms of varying size, and this is the morning when all the artists exhibit-ing may come for a first view. The search begins at once. Each will find his own picture and will varnish it if he sees fit or will have his "color-man," the man sho sells him paint, do it for him. It is a great day for the artist

who has tolled with might and main, who has worked often against fearful odds to put the best that is in him into some work of art. Near me was F., who lived for a year in one room is Paris on nothing but oatmeal, with an occasional invitation

to-dine on something better. Not far away was H., who sold out his business in a small town and came, in middle life, to Paris, that he might study art and his wife music. Are they succeeding? Of course they are succeeding.

Time would fail me to tell of all. There were the farmers in the world of art to whom each new Salon means only one more triumph, and there were the young art students full of enthusiasm and the conviction that their work is going to revolutionize art and make all the past sink into insignificance. All these and many more were in the mad rush on the stairs, for the small group had increased to a large one.

There is no hesitation on reaching the top of the stairs, a hurried look around the first room, if my picture is there I stop, if not, I hurry on and stop not until I have found it. Then I plant myself in front of it and consider well the circumstances in which I find myself—that is to say my picture. Usually there is a rapid change of countenance. The most successful men are least pleased. Am I "skied" or am I on the line? Do the pictures

around mine take the color out of mine or not? Briefly do I appear to advantage in the Salon, or was I better in the studio? Why do I appear to a disadvantage? Is the picture poor or is it only badly hung? This is the question that each man asks himself and, according to his honesty I have said that the most successful are not the best

satisfied. See the man standing in the middle of Salie twenty. Isn't he a picture of discontent? He has two twenty. Isn't he a picture splendid things on the line.

He has had all the honors that a foreigner can win in and France is the most generous nation in the world to foreigners. He has lately made two voyages to America and came back with his pockets full of money, as they say in the Latin quarter. What can be the matter with him? A friend tried to find out and to congratulate but got a growl and scowl for his pains. You may

try it if you like, but I shall keep my distance.

See the other little man near him. He is about the happiest man here today. All winter he lived and worked with a friend—as large as he is small, in one room.

They cooked their own meals, made their own beds, sleep-

ing in colored blankets to save washing.

Do you want to know his name? You will hear it when his pictures are selling for thousands. That will make you open your eyes. In the meantime, he is as he expresses it, "grinding out paysages from six in the morning 'till dusk," and one of them, his first in the Salon, hangs there in front of him. It is framed in tarnished gold picked up in an old curlosity shop in the rue de Rennes. The picture is not on the line, but it is accepted and it is hung and hundreds

have been refused.

He is thinking of them, poor devils! Not one of them here this morning, and his friend among them, gone off to the country to dig away harder, bound to come out ahead. What a difference between their lot and his. His heart is filled with thankfulness and all his hardships, his common food and his shabby clothing are forgotten in this blissful moment. Next year he will be harder to please. It is the way of the world, or, as the Frenchman says.

"C'est la vie." But who are these? You remember we met them last year. She is the little woman who deserted the honor-able and well-paid vocation of nursing to marry an art student and adopt his precarious method of earning a livelhood. They have had a struggle and many times the wife has eked out the family income by again taking up

her old work. Wherever you find them it is cozy and pretty. They ork along together and are among the happiest you can nd. This year she has a picture well hung and his etchings are accepted. Now they have only to hope, for the customer who will want some of their wares.

Here comes the rosy cheeked English girl, who paints the charming Dutch interiors and is so modest about her accomplishments. She is accompanied by the American girl from the breezy west to whom nothing small ever appeals. Who paints every year and all the time, big, almost brutal things and puts them aside hoping for the day when they will find a place or she can paint the smaller things that might sell. The group of distinguished men around the most promi-

nent picture in the room is evidently French and they are lost in admiration of their fellow worker, Maxence. They speak in low tones gesticulating and calling attention to one point after another in the quiet picture of "Devo-tion" that hangs in the center of the wall.

Farther on, in the next room, the youngest exhibitor of the year, a boy of twelve, is engaged in varnishing his own canvas while a delighted father proudly surveys

Nearly three hours have passed. The work women in rows are still stitching, stitching and nailing the great lengths of carpet that cover the luxurious rooms. Below we notice that nearly all the brilliant plants of scarlet and green have been placed among the gleaming statuary. It is a beautiful and imposing sight, and now all must pass out leaving the great building ready for Monsieur Le Fallieres to formally open it to the public.

Autobiography of Adelheid Popp

(Continued from yesterday.)

In the factory I became another person, since my thoughts were somewhat free from the earlier melancholy sentimentality. Previously I had isolated myself, so that there would not so much intimacy arise between me and my companions. At first they considered this reserve and bashfulness, then as I did not change they took it for pride. But as I was always agreeable, and never excluded myself when it was a question of any co-operative assistance in favor of a companion, they became accustomed to my disposition.

The workers also, with whom the girls joked during the rest intervals, in the courtyard, finally let me go my own way. They also called me proud, because I did not take part in their entertainments, and refused to talk with the men. "She certainly thinks that she will get a

count." was often said. Now, since, I had a goal before me, and as I was thoroughly filled with the thought that all people must know what had become known to me, I gave up my reserve and related to my companions everything I read concerning the labor movement. Earlier I had frequently related things when they asked me to. But instead of Ohnet's "Cottage Owners," or the fate of any queen, I now told them about oppression and exploitation.

them about oppression and exploitation.

I told them of the accumulated wealth in the hands of a few, and spoke of the shoemaker, who has no shoes, and the tailor, who has no ciothing, it contrast. In the intervals I read the articles in the Social Democratic paper to them, and explained what Socialism means, as well as I understood it. With great emotion I advocated my views, when the anarchists and Socialists were rep-

paper to them, and explained what socialism means, as well as I understood it. With great emotion I advocated my views, when the anarchists and Socialists were represented as being on the same level.

My activities did not remain unobserved. The overseers became attentive, and there was talk about me. But I made careful efforts to give no just cause for blame. Previously I often came too late, just as the others did, but now I accustomed myself to promptness.

I did my work with painful precision, as instinctively the idea had matured in me that if anyone wants to serve a great cause, he must also do his duty in small things. I did not yet know how to express this thought exactly at that time, but I was positively governed by this view.

When in the afternoon lunch period, I submitted the contents of my paper and tried to explain them, with energy and enthusiasm, it frequently happened that one of the office clerks went by and, shaking his head to another, said: "That girl talks like a man."

Now, I went after my paper every week myself. As I entered the salesroom of the Social Democratic paper for the first time, I felt as if I were entering a sanctuary. And as I delivered my first ten kreutzer for the election fund under the motto: "Firm Resolution," I felt as if I were shready a member of the great fighting army, though I did not yet belong to any association and, other than the friend of my brother, had not spoken to any Social Democrat.

As I always read in my paper, "Solicit new subscrib-

Democrat.

As I always read in my paper, "Solicit new subscribers!" "Distribute your paper!" I attempted to work with this intention. When every week I could go after not only one paper, but two, then three, and finally even ten copies, there was nothing more with which I could compare my pride. My journey after the papers was always something like a holiday for me. I put on my prettiest dress on that day, as I did earlier when I went to church.

Although very little was written in the Social Democrat paper about religion, still I lost all my religious conceptions. This did not happen all at once; it was a slow development. I did not believe in a God anymore, and in

"vetter over there." but thoughts always came to me

again whether there was not something to believe.
On the same day on which I endeavored to prove to my companions that the creation of the world in six days was only a myth, that there could not be an Almighty God; because then so many people would not have to suffer such cruel destinies, on the evening of that same suffer such cruel destinies, on the evening of that same day I again folded my hands and raised my eyes toward Mary's picture. "Perhaps after all." I thought repeatedly and involuntarily. I told no human being that such doubts still tormented me.

But the descriptions of Siberia and the horrible things that reached publicity from St. Petersburg, and which I learned from my paper, I used to demonstrate to my companions that there could be no God, who influenced the history of people.

the history of people.

My Social-Democratic convictions always became more definite, and I had to suffer a great deal in the factory.

My reverend superior, who exercised his tyrannical power My reverend superior, who exercised his tyrannical power over our entire room, was always brutal and cross. Now he appeared to me absolutely like a devil. He was the first person whom I really hated, and, although many years have passed since I have been removed from the aphere of his power, I today still feel all the spite and all the hate hen I think of him. When in the course of years many conditions in the factory were made worse, this in reality was to be attributed to him.

The presence of anyone in the factory who had pro-

The presence of anyone in the factory who had provoked his discleasure, if they had only tried to defend themselves against an unjust reprimand, could be made a hell by him. I had not given him any occasion as yet to busy himself about me especially. Now it was otherwise, for he also observed my influence upon companions. for he also observed my influence upon my companions. This did not please him, and he began to watch me. began particularly to check my work, where, it formerly he was contented to look after it once a day, and if often he did not observe it at all, now he came ten times a day.

I was not sure for a moment that he would not come and rummage about in my work to find mistakes. When I arose to get myself a glass of water, he came behind me and stood until I was through drinking in order to follow me back to the table again. Every step that I took, every motion that I made was observed by him.

One day my employer spoke to me and told me that my foreman was dissatisfied with me. "Remember that you have to provide for an old mother," he said in conclusion. I was so confused and disconcerted that I could not answer him immediately. But when I recovered my self-possession, I tried to meet him again, and made him tell me why my overseer was dissatisfied with me.

I referred to the fact that my work, in spite of the repeated checking up, was always in order.

The manufacturer—for a long time I had not regarded him as "bread-giver" any more—looked at me for a moment, then went away with the words: "It is good, work the same as you have been doing up to the present.

I had still no idea of the "Woman Question." There was nothing in the paper on the subject, and I did not read any other paper than the Social Democrat any more. I also knew no woman who interested herself in politics. I was considered an exception, and regarded myself as

The social question, as I understood it then, I held as The social question, as I universition it then, I nem as a man's question, and politics similarly was a subject for men. Only I would gladly have been a man, so that I, too, might have a right to be engaged in politics. That the Social-Democrats wanted to obtain equal rights for men and women I discovered for the first time when I accidentally read the Social Democratic program. How women themselves could work with the party in its struggles I did not vet know. did not yet know.

PRINCE HAGEN UPTON SINCLAIR

Prince Hagen is the personification of capitalism. For himself, he mocked at morality, but he realized fully how the present ethical and religious standards protect him and his class. The workingmen are many and we are few, he says. They are a thousan I times more powerful than we. Only their religious beliefs, their moral scruples and their fear of the law separate them from our wealth.

As a work showing the value of existing insti-tutions for the protection and support of the capitalist system, Prince Hagen is invaluable.

A Chapter in the History of Labor

The transformation of the Chicago Arbeiter Zeitung into a daily Socialist paper closes one of the most striking chapters in the history of labor's upward struggle. The paper was founded in 1876 by a group of German revolutionists, largely exiles from the persecution in the Fatherland. They were connected with the old International Workingmen's association, in which the influences of Marx and Bakunin were yet struggling for control.

The question of the value of the ballot in the struggle for freedom was still denied. There were those who looked for victory to come through a great forcible uprising of labor, and others who thought the road to liberty lay along the lines of union activity. Even in Germany Liebknecht was still looking with disdain upon political activity and, although a member of the Reichstag, had recently declared that the Socialists entered that body only for propa-

Yet in its beginning the paper founded by these German Socialists gave its support to political activity. Candidates were nominated on a so-called Socialist ticket, although an examination of the literature of the movement shows that there was little in .common between that movement and the Socialist movement of today, a fact that has received still further proof by the subsequent history of many of the leaders of that movement.

But a ticket was nominated and these early champions of labor set to work with an enthusiasm and sacrifice that has seldom been equaled to secure success at the polls. They succeeded in casting MONEY. enough votes to elect their candidate. But they had not made allowance for the dishonesty of election officials and the election was deliberately stolen by these officials.

Right then and there was sown the seed that was destined to Socialists lost faith in the ballot when they saw the results of their lation of the government to his busiyears of toil and sacrifice snatched away in a moment by corrupt ton as a prime element in his calculations. They turned in desperation to the weapon with which our ancestors bought their freedom from England and began to arm that now checks investment in secur-that now checks investment in security in the sec army in the recent Civil War, or had been trained to arms in the radically change the whole organization of our corporate affairs.—Economist. and unfurled the flag of anarchy.

To be sure the anarchy which it defended bore no resemblance to the anarchy of the sensational capitalist newspaper. In fact, it was almost identical with pure and simple trade unionism, with the added demand for a complete overthrow of society by some sortiof revolt or general strike.

Then came Haymarket, the hanging, the reign of terror inaugurated by the corrupt hirelings of Chicago capitalists, and the long inquiries properly by mail, and we, period of inaction and almost despair. During this time the German therefore, are trying to enlighten the unions, that largely controlled the Arbeiter Zeitung, were more any results from and hostile to political action. The few Socialis absolutely required in order to carry on a successful co-operative. Such a system must be absolute justiness to hinder work among the German laborers,

They were familiar with events in Germany. They knew the strides the members for the co-operative.

The intent of a co-operative is to return all the profits made in dividends to in America composed of many nationalities in addition to the Germans. This movement began to gain its own victories.

So it is but natural that after all these years of wanderings the Arbeiter Zeitung should once more be found back in the fold of Socialism. Once more it has been proven, as it has been a hundred times before that the Socialism to the sum of t Socialism. Once more it has been proven, as it has been a hundred times before, that the Socialist movement is the most deadly enemy member is entitled to dividends on the ply to your advertisement. THE PREDATORY POOR—II

BY ROBERT HUNTER

Yesterday I spoke on the Metropolitan Temple of New York of a clergyman, the Rev. Dr. John Wesley Hill, of the work that clergyman is doing, and of one Max Pam who preached in the temple, on the predatory poor.

He spoke of national perils and the greatest of them,—"that dread doctrine of the predatory poor," and I tried to inform my readers of the life of the predatory poor in Paris.

But we also have readers.

atory poor in Paris.

But we also have predatory poor in this country. I remember those I once knew so well when I lived in the Stock Yards of Ohicago.

Many thousand human beings live there, struggling fiercely against want. Day after day, year after year, they toil with marvelous persistency.

Obnoxious as the simile is, they work from dawn until nightfall or from sunset until dawn, like galley-slaves under the sting of want and under the whip

hunger.

On cold, rainy mornings, at the dusk of the dawn, I have been awakened, hours before my rising time, by the monotonous ciatter of hob-nailed boots the plank sidewalks, as the procession of the factory passed under my

Heavy, brooding men, tired, anxious women, thinly dressed, unkempt little ris, and frail, joyless little lads passed along, half awake, not one uttering a ord as they hurried to the great factory.

From all directions thousands were entering the various gates,—children

of every nation of Europe.

Hundreds of others, obviously a hungrier, poorer lot than those entering the gates; some were ragged and almost shoeless, but all with eager faces—waited

n front of a closed gate until finally a great red-bearded man came out and selected twenty-three of the strongest, best looking of the men.

For these the gates were opened, and the others, with downcast eyes, marched off to seek employment elsewhere or to sit at home, or in a saloon, or in a lodging-house, until the following morning, when they came wistfully again to some factory gate.

In this community, the saddest in which I have ever lived, fully fifty thousand men, women and children were all the time either in poverty or on the verge of poverty.

It would not be possible to describe how they worked and starved and ached

They broke their health down; the men acquired in this particular trade :

painful and disabling rheumatism, and consumption was very common.

The girls and boys followed in the paths of their parents.

The wages were so low that the men alone often could not support their families, and mothers with habies toiled in order to add to the income.

They gave up all thought of joyful living, probably in the Lope that by emendous exertion they could overcome their poverty; but they gained while work only enough to keep their bodies alive.

Theirs was a sort of treadmill existence with no prospect of anything else in a but more treadmill. life but more treadmill

And when they were not given work in the milk they starved; and when they grew desperate, they came to my office and begged for bread.

And in the midst of this tragic memory come the hollow words of one Pam and the defense of capitalism, the cause of all this misery and oppression, by one Rev. John Wesley Hill.

And the only retort that comes to me are the words of our friend Micah, the prew prophet. He knew lawyers like Max Pam, and priests like John dey Hill.

And he spoke of them as the heads that JUDGE FOR REWARD, the priests that TEACH FOR HIRE and the prophets that DIVINE FOR

'At the time I left the great Socialist congress I thought that I for one would there is an article by my fellow citizen offensive.

As an owner of land, the primary source of most of the necessities, comcause he HAS NOT GOT ANY JOB OF HIS OWN, and if he has NOT GOT HAS OWN, and if he has NOT GOT be classed, according to the class struggle theorem and failed.

As an owner of land, the primary source of most of the necessities, comforts and luxuries of life, and as an exploiter of labor, the farmer should be classed, according to the class struggle. cause he HAS NOT GOT ANY JOB OF HIS OWN, and if he has NOT GOT ANY JOB, HOW IN THE NAME OF SENSE CAN HE LOSE ONE! Or do the writers mean that if the Oriental comes in here that the owners of the jobs will bestow them on the Orientals instead of on the so-called native Amer-

If they do mean this last, then I can assure them that the owners of the jobs will give them to whom they see fit, whether the Orientals are here or in their own native land, and if there was no better argument in favor of ex-clusion than that advanced on the floor of the congress and in Comrade Miller's article, then I would necessarily be in favor of the open door. Because, bar-ring all other considerations, the Orien tal will get the jobs away from the worker faster in his own native land than he will if he is brought

over here.

If his labor will produce the world's product cheaper than Americans can produce it, then the owner of the job will take the job to the Oriental and have him do the work in his native land, and in his own native land he will have no hope, no stimulant to induce him to even aftempt to raise the scale of wages or better his living conditions, whereas if he is allowed to come to our country he at once comes into contact as an eye-witness with conditions that once sends a thrill coursing through his whole being and awakens a desire for better things in him that makes him reach out to take more of what he proeven though what he could take be less than what the Americans

would take. So if the job is taken to the Oriental the American worker will not have it and the only difference will be the condition of a jobless American with the Oriental at home and the jobless American with the Oriental here, and the only argument there can be in favor of exclusion is the argument that if th Oriental is here the capitalist will point the finger at the Oriental and thereb induce the starving American, the job less American, to spend his energy in fighting his yellow brother instead of fighting the capitalist as he should.

All I can say is that if the American

worker is so densely ignorant that he can be made a cat's paw of in that manner, I have little hope for him, and almost believe in the law of the survival of the fittest, and that he will have to be wiped off the face of the earth and thereby make room for inteligent beings.

However, the above argument is the only one in favor of exclusion and it was obscured all during the debate in the verbiage about the Oriental taking the job of the American worker, that he does not possess, and not till I had quizzed Comrade Untermann, after the ote was taken, dld I get out of him the above thought, and Comrade Miller's article is along the same line.

It talks of losing a job that you have

ot got and never did have, and only obscures the real issue.

If the exclusion will prevent a race war and bring on the class struggle so as to force the two mighty forces, the past and the future, capitalism and So-cialism to lock in that deadly fight to a finish, that can have but one result, the triumph of the workers, then every So-cialist will be in favor of exclusion, but

gle, with the capitalists, but as a producer by his own labor and being ex ducer by his own labor and being ex-ploited because he has no voice in determining the market price of his prod-ucts, he should be classed with the workers.

The farmer vote is indispensable to the national success of the Socialist party, but how to get that vote and still maintain the sacred, Utopian class still maintain the sacred, Utopian class struggle doctrine, intact and unimpaired, is the great unsolvable problem that the Socialist congress could not master. They have yet to learn that human nature is relatively the samo it all classes, no better, no worse, that the real progress of humanity is not the result of class struggles, but of intellectual development, discovery, invention and the application of system and science. and science.

They will probably learn these things by bitter experience and they will oven-tually discover that an avowed class party can never win national success in this country. Agriculture, at its best in all its branches, is a vast and progressive science and, because of the limited knowledge and resources of the individual farmers, it cannot be brought to its highest paragration, except. to its highest perfection except on a national scale.

When a Socialist party is organized that leaves out the class struggle non-sense and appeals to all the people, with the evident advantages of a co-operative system over the present one, the farmers will probably take to it as readily as any other class, and Socialreadily as any other class, and Socialism will have a fair chance. I presume you will not consider it good policy to publish this letter, but there may
be something suggestive in it if you
read it about twice and reflect on it.

A Voice From Arkansas In Comrade Hillquit's report he tates by inference that a party made up of those comrades known in the

past as Jimmie Higginses would be a dead failure, and to this as a Jimmie Higgins I state emphatically he is dead wrong if he has in mind a Socialist party that is to bear palatable fruit for that class of society which is willing to do its share of the useful and necessary work of society and no more and to leave undone for those other members of society to do who have

during the year passed while being useful and necessary members of society as productive laborers, made them realize that there was something radically wrong somewhere in society, and when the Communist Manifesto was first placed before them it was read and re-read until their right hand shor out in fellowship to a Ben Hanford or others who had more of the news to

Had the minority report at the last congress come right out and stood fair and square for the open door, its report would have been adopted, even though we should have to reverse the decision after the friends of the majority report had presented their evidence. As it was, the whole subject resolved itself into an oratorical contest in the shape of a debate, and little or no evidence was presented either for or against exclusion.

Now and for the next two years to come it is good time for sober thought and, incidentally, some facts on the question, a commodity we have not dealt question, a commodity we have not dealt in the convention.

I have been greatly interested in the discussion of the farmer question, in the Chicago Daily Socialist May 19 and 20.
