SAN FRANCISCO, July 29.-That the Holman machine on the S. F. waterfront will not so easily mislead the longshoremen was made clear when finally, due to rank and file demand, the first meeting was called.

The meeting, held on Friday, July 29, was packed, and many workers were turned away, The officials deliebrately packed the auditorium of the Labor Temple, mainly interested in packing in their own supporters. Conviction of Cohen Fails To Break Up United Front

DENVER, Colo., July 26. - The arrest which the bosses expected to break up the United Front has only spurred the workers on to greater activities in organizing a huge demonstration at the State Capitol August 1 against war and hunger. Many thousands are expected to be present, as Gov. Johnson is calling a special session of the legislature for then. The United Front will demand the enactment of the State Social and Unemployment Insurance bill presented by the hunger marchers January 23.

Workers filled the Carpenters' Hall to overflowing the past two Sunday nights at mass meetings peace. protesting the arrest and conviction of Henry Cohen last week.

The trial of Cohen, secretary of the United Front for Unemployment Insurance, was marked with perjury on the part of charity of fice stools who swore that Comrade Cohen advocated the workers taking up arms and that many of those at the July 6 demonstration at the State Capitol were armed. Miss Robinson, head of the charities, raved against Cohen for leading committees and families to the relief stations.

The International Labor Defense is urging all workers and organizations to send protests against the conviction of Cohen to Mayor Begole and to Police Court Judge

Workers of Denver have scrapped together enough nickels and dimes to appeal Cohen's conviction. He was fined \$50 and \$25, on disturbing the peace and vagrancy.

Investigation Is Step To Finding Schemes For Cutting Many Off

LOS ANGELES, July 28 .- With the number of those on relief reaching the huge number of almost a half million, the Los Angeles Board of Supervisors has become alarmed and its chairman, John R. Quinn, has ordered an investigation. Although giving as the reason that they want to determine why it is that the relief list is growing 600 families daily, and now covers more than 25% of the population, in reality this is a preliminary step for cutting many off. The Relief Workers Protective is the main factor that is forcing the authorities to continue pay

Inexperienced Men Sent To Fell Timber

SAN FRANCISCO, Aug. 1.-The long list of fatalities directly chargeable to Chas. Wollenberg's ruthless disregard for the safety of workers on San Francisco forced labor projects, claimed another victim Wednesday, when John Hunter was killed by a falling tree at Sutro Forest Camp No. 1. Headed by a newly employed

flunky foreman, who had never been experienced in timber work, Hunter and other inexperienced men were sent to the mountainside to fell trees. Instructed to speed-up the work and save all of the time possible, the inviolable law of the woods to call "timber" ten minutes before a tree falls was ignored by the flunky and Hunter was killed without warning and without a chance to run to safety. Five others narrowly escaped serious injury and death when the tree shot out into space and crashed down the mountain slope.

FIXED WAGES -- MOUNTING PRICES

By this time every agency at the service of the capitalist class has been mobilized to "ballyhoo" recovery in a campaign that finds a parallel only during war-time Liberty Loan drives.

The real facts, that basically there is no indication of the promised recovery, are drowned in the capitalist lying press, with screaming headlines alleging that millions are going back to work. The boss-controlled play, song and scenario writers are working overtime, turning out trash, already singing a farewell to depression. Nonsence such as the Aimee vs. Hutton issue, the Jolson-Winchel "fight" is flooding through the papers and radios to a degree never yet experienced.

All this, like a huge Coney Island, is cleverly designed to daze the masses, to draw their attention away from the real situation, that:

In Los Angeles County, for example, 600 new families go on relief daily, and the number now on the relief rolls has grown to the staggering figure of a half million, almost 30% of the population. In many cities, as in New York, all have been cut off relief.

So intolerable have conditions throughout the country become that a wave of strikes is spreading, involving hun dreds of thousands every week.

That in the cases of practically all codes submitted so far the wages are cut even on the basis of the hourly rate, but with the cut in hours there is still a greater reduction

That as the capitalist business experts and statisticians admit, consumption, that is the buying power of the masses, is lagging far behind production, and stocks are piling up, since the recent rise was only because of an anticipated market.

Thus far the Roosevelt administration has had more success in destruction of products (wheat, cotton, etc.) than in raising production.

REAL WAGES WILL FALL

But the fact that bosses and their recovery administrators are most anxious to hide from the workers is, that while wages are being set at a definite figure, prices of necessities are not. Dun & Bradstreets, Inc., report that wholesale food prices for the four months up to the end of June, show a 30% rise. Retail prices of these main items in a worker's budget rose even higher. A check in any grocery store can prove that. As the inflation policy goes further into effect, and as monopoly prices agreed to in dentist's artistry. Whereas over children eating out of garbage the codes become facts, prices will continue rising. But there is no provision in any code for a corresponding increase in wages. On the contrary the wages of such as are now getting above the minimum scales, in virtually all codes, are left to the discretion of the employers. Which means either no increase or being fired and rehired at the

On top of all this the bosses (many of whom are really imagining that there will be a great increase in demand) are setting their machinery in motion for the most intense one for America. speed-up to make up for any cut in hours.

It is because of the slow progress in getting agreement among the capitalists in each industry for codes, that the Roosevelt administration, representing the entire capitalist class, hastened with the Blue Eagle, blanket code. This is the system that is being hailed as "recovery' and which the A. F. of L. labor misleaders, the Socialist Party and so-called liberals are helping to establish.

But the workers think differently! A strike wave effecting thousands in most basic industries is sweeping through the country. Gradually the fog is clearing. The workers see the real nature of the Roosevelt "Recovery." They see how, as in Pennsylvania, the national guard is being sent to the mine strike area to jam it down the ized sports, for our movie stars, fail, while Litvinov bagged all the for the Bolsheviks hereafter, and workers' throats.

TUUL CONVENTION MUST MARK TURNING POINT!

The Trade Union Unity League holds its California Army Officers Alarmed A State Convention at a time when its leadership is needed by the workers as never before.

The strike movement is likewise aimed | tinue the Roosevelt forced labor against the company unions offered by the bosses. The 'News' Gets Comfort from Communist Self-Criticism

The San Francisco News, in an editorial on July 26th, entitled, "The Red Menace' Fades," rejoices in quoting from the Daily Worker, official organ of the Communist Party, an "admission" that the Party is still isolated from the main masses of the American industrial workers.

So, as many other capitalist papers, the News supports the Trotskyites, Lovestone and similar renegades, the Socialist Party, who are members, 26,000 to 28,000 of whom active with such attacks against the Communist Party.

To those not acquainted with the Communist policy of selfcriticism, it may be understood that the Party is ready to close up. And his is precisely the idea that the News wants to convey. But what are the facts? The quotation is taken from the Open Let-

er, now in the hands of all members. The central feature of the Open Letter, while recording significant progress, is that we consider our success is too little considering the possibilities offered during the four years of crisis.

It may be interesting to News readers to know that during the same period the Party membership has trippled and now includes mostly native born. It may even comfort the News to know that in California the membership has quadrupled. The Party's influence has increased tremendously. Who does not know of the huge demonstrations, strikes, that the Party leads? Who doesn't know of mass campaigns such as for the Scottsboro boys, for Mooney, for Unemployment Insurance, under the leadership of the Communist Party?

Nevertheless, Communists never sit back and glory in their suc cesses, but always criticize their mistakes and weaknesses, so as to be able to correct them and to advance at a more rapid pace.

The world capitalist agents always are gleeful when leaders of the Communist Party of the Soviet Union publicly reveals weaknesses and broadcast that the Bolsheviks are "giving up," but after 16 years of such "giving up" the Soviet Union has emerged the greatest power on aries of the revolutionary mass orearth—has demonstrated the building of Socialism—has surpassed the imaginations of even the most optimistic

International Events and Western Workers German Communist Party Does Not Falter!

How Many of the Leaders Were Arrested? Has the Communist Party Been Able To Continue Functioning? The Russian and the German Revolutions; Legality And Illegality; Communists Never Cease To Be Communists! The Heroic German Working Class.

Below we print in part an analyses by a leading German Communist, Comrode Schwab, of how our German Communist Party struggles against Fascism. The facts are sufficient to refute the lies being spread by the "Socialists" and the renegades, especially the Trotskyites that the German Party has

been suppressed. Although it is asserted in the ascist daily press, for agitational easons, that the German Communist Party has ceased to exist, the or a minute on the fact that it has not succeeded in driving out the Communist Party.

The organ of the Vice-Chancellor on Papen, "Der Ring," of April is compelled, albeit wrathfully, to declare in a long article on "The Situation of the Struggle Against Communism":

"The German Communist Party has not, like the through-and through pacifist - reformist Ger-Social - Democratic Party, presented a single miserable picture of decay, has not given up the achievement of its objects: the establishment of the Prolitarian dictatorship, the struggle for a Soviet Germany. Naturally, the German Communist Party, already in closest touch with the Communist International and the Communist Parties of the adiacent countries, is busy creating new conditions for agitation and they should eat, how they should action.

"In fact, the Germany Communist Party is already on the job to carry out these Comintern directives. On the one hand, a whole series of measures may be discerned and as far as can be ascertained, i. e., as visible to a considerable extent, also discovered by the authorities, these measures aim at insuring the organizational prerequisites for the widest agitation possible, even under the most difficult conditions of illegality. It is not opportune to give a detailed description of this activity and its partial successes, as this would entail the danger of making propaganda for an adversary, robbed of any possibility of carrying on public agitation. It suffices to know that the active membership of the German Communist Party asserts itself under cover and "illegalizes" its action to an

ever increasing extent."

PREPARED FOR ILLEGALITY It must be ascribed solely to the preparations for the illegality that of the members of the 23 Party very few could be arrested and that these secretariats, albeit under more difficult conditions, can carry on their work to the fullest extent. Among the members of the Party district committees-about 700 in the whole of Germany-the percentage of those arrested, taking into "science protected while experiaccount that the illegal life of these menting," mines, forests, fields omrades le iculty, is camparatively low. The greatest losses have been suffered by the Party in its lower and middle cadres of functionaries. But even here it would have been possible to restrict these losses to their minimum if a better link betras, peephole experts, the orations watered with loving care—in short tween legal and illegal work had of grafters and fakers; they didn't culture made universal, instead of existed in the past, and if certain forms and methods of illegality had been applied in carrying on legal work. This weakness in the link ing up of illegal and legal work reveals itself also at the present time in the fact that our comrades experience difficulties in taking sufficient advantage, in their illegal status, of the possibilities of legal work which, however few, are

> The adaption of the lower organ izational units has asserted itself best. It is true that when strict illegality set in, this adaption had not yet been effected in all districts, but it had already progressed

LITTLE LOSS

Only one example, to show to what extent this adaption has been successful, taken from a unit which started the adaptation of its organ izational units in December and January and had completed it to a large extent when the illegality set in. When Hitler assumed power this district had 36,000 registered had regularly paid their monthly members' dues in the past. In the month of March-the month of the most bloody terror—this district from 20,000 members. Where, Mr. Trotsky and Mr. Hitler, is the crushing of the Communist Party to be seen here?

It has come as no surprise to us. and on the whole we were also prepared for the fact, that there were certain cowards and even deserters, and that owing to the retreat of the petti-bourgeois and intellectual strata, many of the possibilities for illegal work created in the

period of preparation cannot be utilized. Under the blows of the counter-revolution the real revolutionary kernel of the Germany working class is being crystalized, this iron cohort of hundreds of thousands, hardened in the fire of the class struggle, who are the bearers of the proletarian revolution in Germany.

However, there are a whole eries of conditions under which ve German Communists must take ip the struggle for power, which are incomparably more difficult than those prevailing in Russia in 1917. It would be erroneous to want o draw a parallel between the situation in 1917, when, amidst persecutions and slander, the Bolsheviks were preparing their Ocober revolution in illegality, and the present situation in Germany. German Communists must gain the active support of the majority of the working class under much more difficult conditions. At the present time only a small part of the poor peasantry stands in our camp. The war had given arms to the Russian worker and poor peasants, he had but to turn his

gun in the opposite direction. We, on the other hand, must first obtain our arms in the struggle The Russian revolution was car ried out against a bourgeoisie which it was comparatively easy o conquer, because it was a weak and demoralized bourgeoisie. We, on the other hand, are compelled to capture power in the face of the pest organized bourgeoisie and the most highly concentrated apparatus in the whole world. The totally different character of the situation results in much more difficult, much more complicated tasks for the German Communist Party, not withstanding the existing training of the German working class, and the existence of a revolutionary mass organization.

"PREPARE FOR DECISIVE STRUGGLE

A leading idea, which Lenin gave way to the October revolution of 1917, is of decisive significance today for the German Communists as well. Lenin declared in a letter on the political situation, written in July, 1917:

"Neither adventurous under-

takings, nor partial resistance, nor honeless sporadic attempts to oppose reaction can remedy the situation, the endurance and steadfastness of the worker's vanguard, preparation of forces for the decisive struggle, for whose victory conditions at present are terribly difficult, but still possible, if the facts and trends here enumerated coincide. No constitutional or republican illusions of any kind; no more illusions of a peaceful way; no sporadic actions; no yielding NOW to the provocations of the Black-Hundreds and the Cossaks: but gather the forces, reorganize them and steadfastly prepare for the decisive struggle, if the course of developments permits it on a real mass national scale.' —"Towards the Seizure of Power."

During the past few weeks the German working class has performed many heroic deeds, not only has collected its membership dues Communists, but Social-Democratic and non-Party workers, too: 53 Trade Unions and People's Houses were occupied by the Fascists, but about twenty of these were defended by the working class, arms in hand, to the last gasp. In this respect we frequently observe a false heroism, with a lack of real mass action, in that a few determined workers try, in vain, to substitute this mass action by their courage. But especially in Saxony we could observe a whole series of mass actions, thousands of workers defending their houses for days on end, and where the Fascists have not yet succeeded, up to the present moment, of taking possession of these houses, or could only do so with the active assistance of officials of reformist organizations. In Hessen, we witnessed the

seige of whole villages, the new methods of alarming the whole working class urban districts by factory whistles and bells, as soon as the Fascists dared to penetrate WORKERS FIGHT

In numerous cases, the workers openly showed the class enemy their class consciousness by SAN FRANCISCO, Aug. 1.-Anadopting resolutions against the Fascist dictatorship, for the release defense of the German working from prison of Comrade Thalman class against Fascist murder and and the other arrested comrades. factory meeting, such as that of the Stuttgart tramways, called by the National Socialists to mobilize the tramway workers for the Third Empire, but which at its close demanded the immediate release of all arrested members of their shop committee, and of all other politiby a non-Party worker-shows that the workers know how to struggle in accordance with new conditions.

True, it would have been necessary, in many of these actions, to there is no doubt that in many factories, where possibilities were available, not everything feasible has been done. Apart from those cases where a direct open retreat from the class enemy or open failures occurred, we must at present judge the actions of the working class on a different scale, and ap ply criticism different from that, say at the time of the Schleicher Government, The Communist Party Committees at the present time have a greater responsibility in estimating how far a certain action can and should be carried in a given factory. At times it will be necessary not to use all the available possibilities to the full, especially in those factories where, up

to now, we have been weak. On the other hand, the feeling must be inculcated, not only into the workers participating in the action, but into more extensive strata of the toilers at the head of the action there is a leadership which acts quietly but with deter mination, self-confidence, coldbloodedness—this feeling, which today is more necessary than ever, even in larger actions this leadership does not loose its composure and can act efficiently. To transmit this feeling of surety and determination to the whole working class is one of the essential tasks of the Communist Party of
